SMART PARENTING SEMINAR

understanding & Nurturing
the potential of Gen Y & Z

Parenting Generation Y & Z is a mystery to parents. Parents find themselves unable to keep up with their children as everything is readily available to them. Gen Y kids are sophisticated, technology wise as they are exposed to Cable TVs, Satellite, Radio, and the Internet since early childhood. However, Gen Z is true digital children — growing up on iPods, text messaging, Facebook, smart phones and YouTube. They are true multi-taskers and have a no-holds-barred attitude about blogging and digital publishing.

With that in mind the SMART Parenting Seminar 2012 will present 5 renowned speakers who will share with participants in addressing the gap between current theories and action while exploring the current challenges on how to Understand and Nurture their kids and to bridge the communications divide.
